

Features and benefits

Feature	Benefit
Practice without a frequency	Hundreds of calls before the first live one.
Objective scoring	Readbacks and clearances are checked the same way every time.
Integrated	Radio is part of the driving mission, not a separate exercise.
Transcripts	Every call and reply available for debrief.
Any station tier	Only a headset with push-to-talk is required.
Not an air traffic service	A training aid. Trainees follow the phraseology published by their airport and authority.

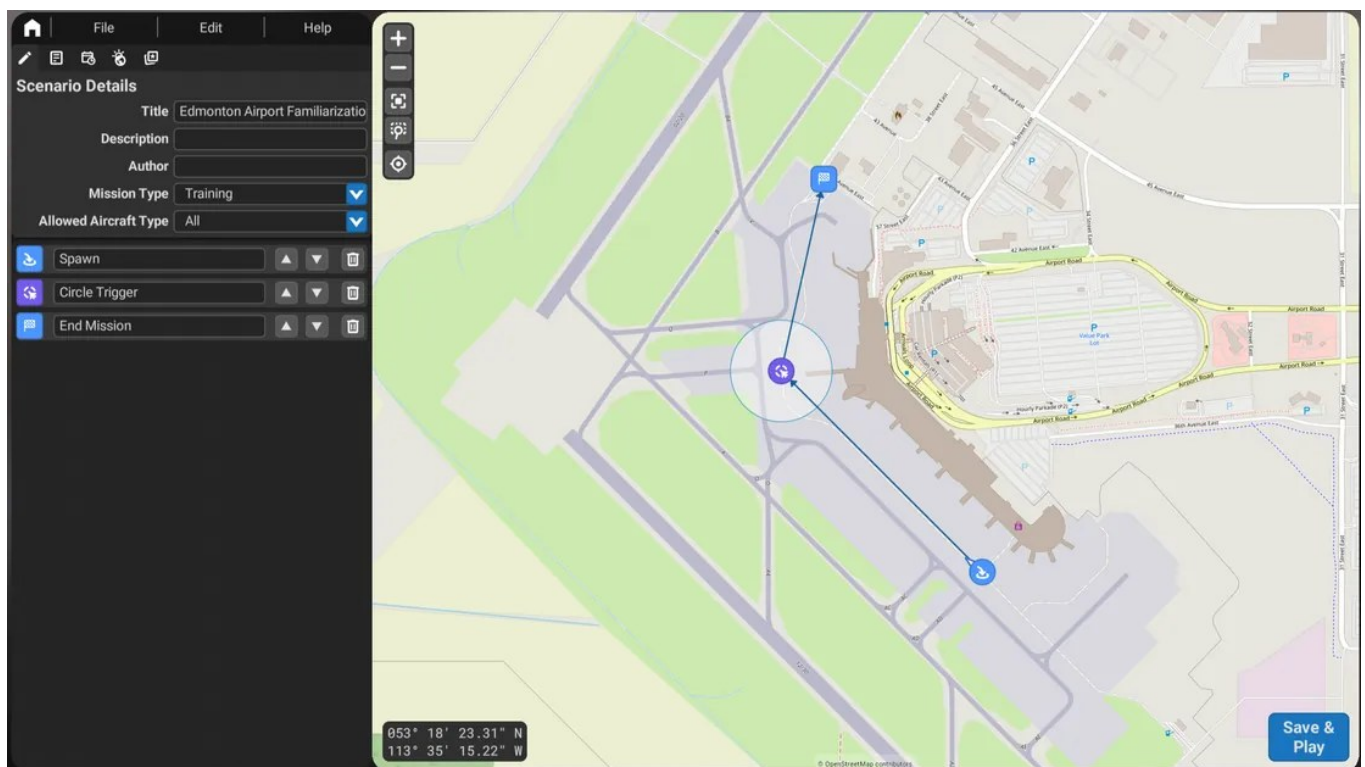

From the digital twin

Taxiway and runway lighting at dusk

What comes with every program

- **1:1 digital twin.** Your airfield, signage, lighting and buildings, reproduced from real-world data.
- **Microsoft Flight Simulator 2024 engine.** World, weather and physics maintained by Microsoft and Asobo.

- **Modular and scalable.** Add programs, vehicles and stations as you go, from desk station to full cabin.
- **Turn-key delivery.** Hardware, software, installation, instructor training and one year of support.
