

Airside Driver Training

Airside driver training on your own airfield. AVOP pre-certification and recurrent training for everyone who drives airside, on a 1:1 digital version of your airport.

Program overview

New airside drivers have to learn a large, featureless site with strict access rules, mandatory hold points and aircraft that always have the right of way. Most of that learning normally happens in an operational vehicle with an instructor. AVOPSIM moves it to a training station: trainees drive the real layout, read the real signs and lighting, meet moving aircraft and vehicle traffic, and repeat until routes and procedures are automatic. Recurrent training and re-qualification use the same missions with updated layouts.

Program at a glance

Status	Available. Core AVOPSIM program
Trainees	Airside drivers, operations, maintenance, cargo and ground crew
Environment	Your airfield, signage, markings and lighting
Vehicles	Operations pickup and your other light and heavy units
Stations	Desk station or driving station

Included	Mission Editor and Examiner Console
----------	-------------------------------------

In this manual

- **Training exercises:** the mission types instructors can assign, repeat and score.
- **Running a mission:** how a mission is set up, driven and scored.
- **Features and benefits:** what the program adds to your training.

Every program runs on the same **digital twin**, **stations** and **instructor tools**.
